MATERIAL & COLOUR SELECTIONS

Colour is where your design story begins. With TOPMIX COMPONENT, designers are free to create spaces that reflect any mood, tone, or personality, from soft neutral wardrobes to striking contrast kitchens. Our curated material selection of premium TOPMIX HPL with E0 Board Core and TOPMIX MFC E0 Grade finishes allows you to mix, match, or boldly contrast surfaces, giving every project its own signature character.

Whether you're designing for calm minimalism or daring expression, TOPMIX COMPONENT provides the colours and textures to make it real beautifully, seamlessly, and handleless. The palette is yours and every choice tells a story.

EDGING COLOUR SELECTIONS

A SMALL DETAIL THAT CHANGES EVERYTHING.

With TOPMIX COMPONENT, every handleless profile can be finished in your choice of edging colour, whether to blend seamlessly with the surface or stand out boldly as a design accent.

Go matching for a refined, minimalist flow, or choose contrast edging for a striking, contemporary highlight. The right edge colour can subtly frame a wardrobe or make a kitchen line pop with precision and personality. There are no limits just possibilities.

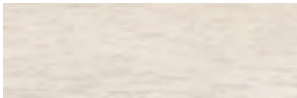

MATCH IT. CONTRAST IT. MAKE IT YOURS.

J CURVE

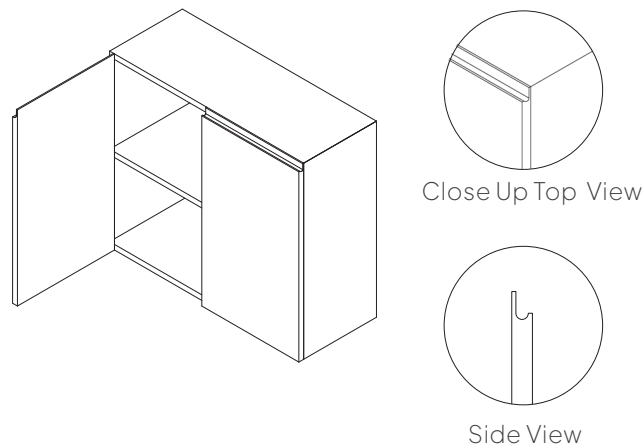

The J Curve profile offers a flowing contour that merges ergonomic comfort with visual softness. Its shape creates a natural pull point while maintaining a clean, handleless facade. A favorite among modern designers, this profile balances functionality with elegance, making it suitable for both residential and commercial projects.

PERFECT GRIP
For Your Space

J CURVE

A smooth curved edge for a soft touch & comfortable grip.

Materials :

TOPMIX HPL E0

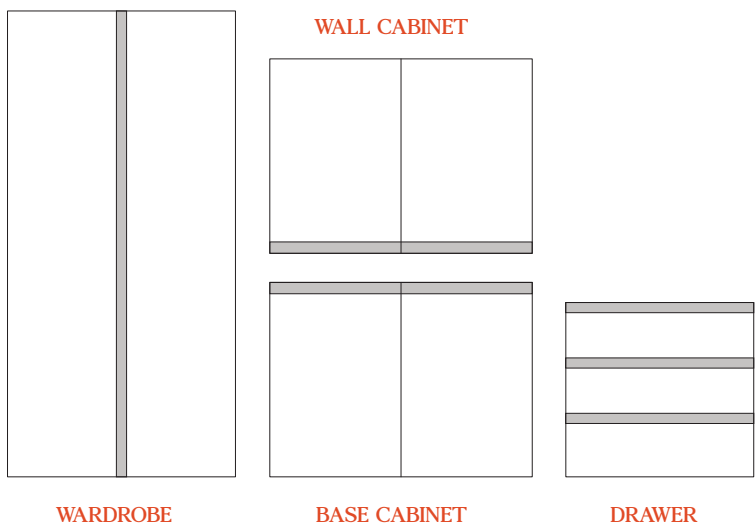

Crafted with premium TOPMIX HPL on an E0 Grade board core, this bonded panel delivers a sleek, durable surface for handleless door applications. Featuring green certified, low emissions TOPMIX HPL, offers a strong, stable build and an easy care finish ideal for creating healthy, stylish, long lasting spaces.

TOPMIX MFC E0

Engineered with premium TOPMIX MFC E0 Grade, this board delivers 3 in 1 performance: Antiviral, Antimicrobial and High Moisture Resistance (HMR). With E0 Grade low emissions and green certified, it's the ideal surface for creating healthy, stylish, and long lasting spaces.

Applications

***Please ensure the hinge side is indicated correctly when placing your order.**

J Curve Profile

Wardrobe

The J Curve integrates vertically on tall wardrobe doors, providing a continuous grip that enhances design symmetry. Its soft curve makes tall door panels easier to handle while creating a sleek, minimalist look. Perfect for modern bedrooms and walk-in closets, pair with the C Curve for smoother door motion and a balanced opening experience.

Cabinet

In kitchen cabinets, the J Curve eliminates the need for protruding handles, keeping the look clean and seamless. Pair it with the Oval Glide to unlock more design flexibility and achieve a range of aesthetic moods from contemporary to cozy minimalist.

“

Tips

Enhance both functionality and aesthetics by pairing the **J Curve** with the **Oval Glide** or **J Curve** with the **C Curve**. This combination ensures smoother, more balanced movement on wardrobes and cabinets creating a refined, effortless experience that complements any modern interior.

”

Drawer

With its ergonomic pull, the J Curve ensures drawers glide open effortlessly, even with frequent use. Its sleek design keeps surfaces visually uninterrupted, supporting the layouts while maintaining long-term durability. Ideal for achieving visual harmony and smooth functionality across your cabinetry.

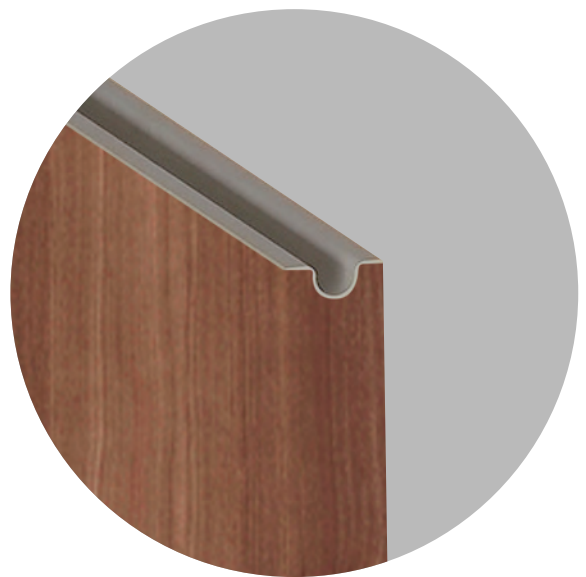

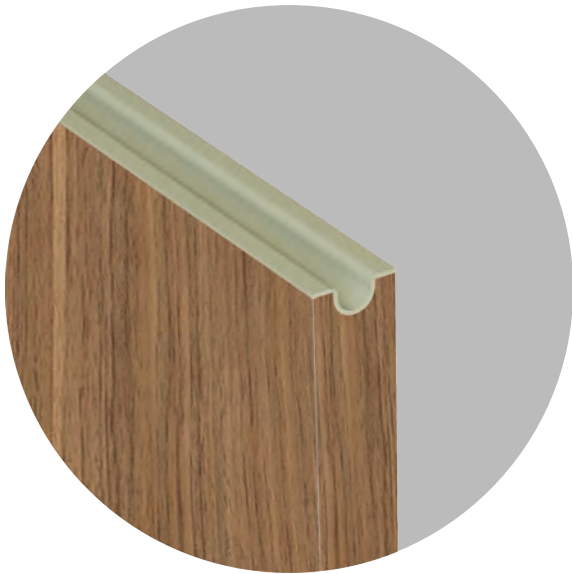

C CURVE

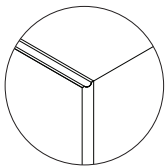

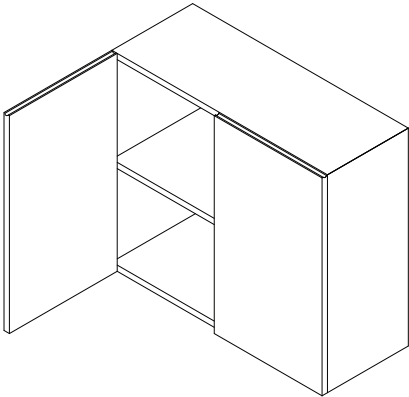

The C Curve profile is characterized by its recessed arc, striking a balance between minimalism and functionality. Its subtle depth creates a comfortable grip while forming a refined line that enhances cabinetry precision. The result is a profile that is both elegant and practical, seamlessly adapting to a variety of design languages.

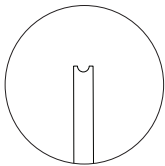

CLEAN CONTOUR
For Your Space

C CURVE

WARDROBE

BASE CABINET

DRAWER

C Curve Profile

Wardrobe

Adds sophistication to wardrobes with a soft recess that's easy to grip, even on tall doors. Its elegant curve contributes to a sleek, modern appearance while ensuring ergonomic comfort. Best paired with the J Curve for balanced door motion and effortless usability.

Cabinet

Ideal for kitchens and living areas, the C Curve enables effortless daily use while preserving clean horizontal alignment. For wall cabinets, the C Curve can be used on its own for convenient upward opening, combining practicality with refined aesthetics.

“

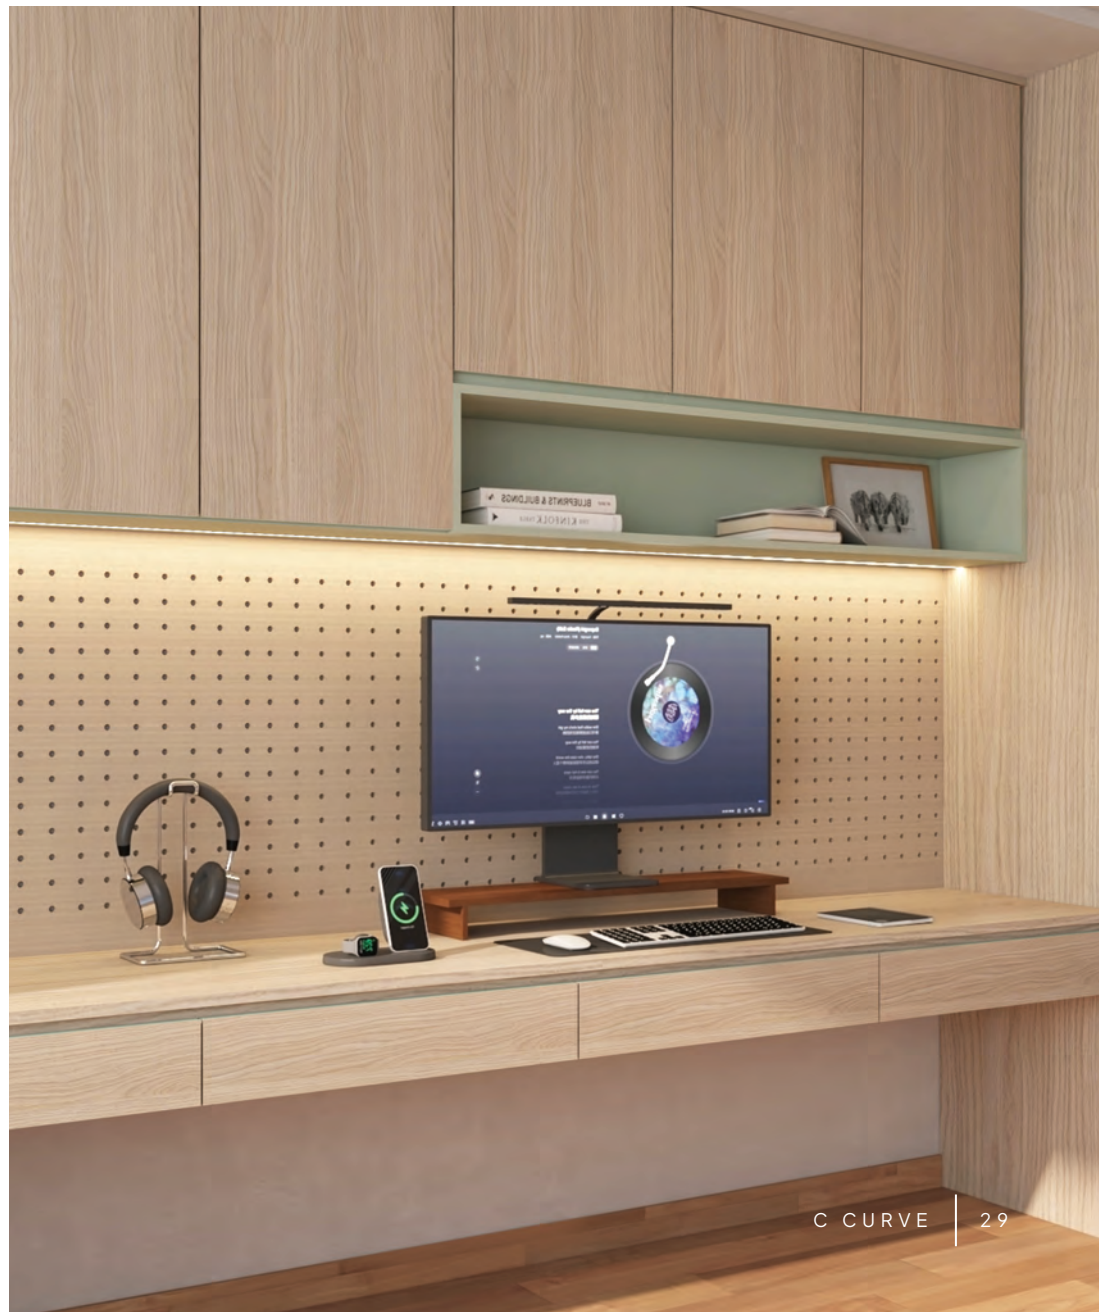

Tips

Avoid using two C Curves on hinged doors as it might restrict the movement. For a cleaner, easier opening, pair C Curve with J Curve or C Curve with Oval Glide. Exception: on kitchen tall pull-out units, two C Curves on opposite sides of the same panel work well for balanced grip.

”

Drawer

Provides smooth, easy access for drawers of all sizes. The inward curve ensures comfort during frequent use while keeping drawer fronts flush, reinforcing a refined and modern aesthetic.

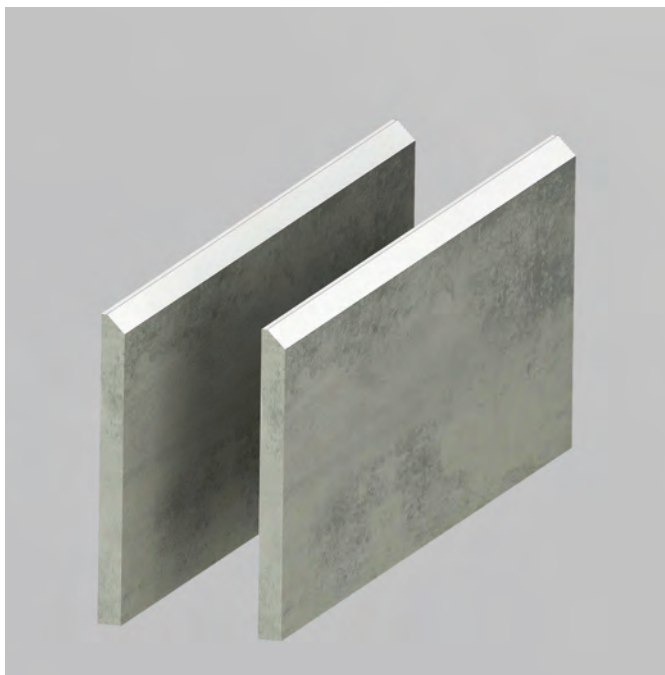

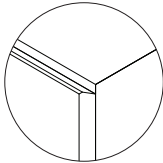

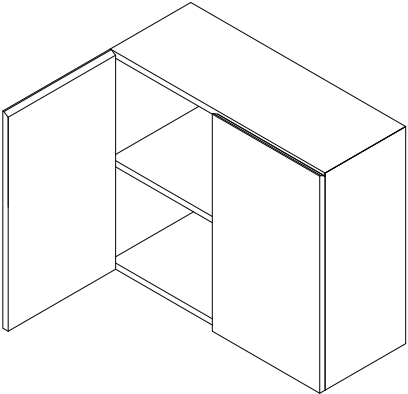

ACC

The ACC profile is defined by its minimalist straight-edge design, making it one of the most adaptable handleless options. Its simplicity allows designers to prioritize finishes, lines, and textures while still ensuring reliable functionality. Blending seamlessly into modern, classic, or transitional spaces, the ACC profile is a dependable choice for projects requiring subtlety with strong usability.

WARDROBE

WALL CABINET

BASE CABINET

DRAWER

ACC

ACC Profile

Wardrobe

Offers neat vertical alignment on wardrobe doors, giving a streamlined look that enhances the sense of order. Its straightforward form keeps large wardrobes balanced, functional, and professionally finished.

Cabinet

Perfect for kitchens or storage cabinetry where surfaces should remain calm and cohesive. The ACC integrates seamlessly into the design, allowing the material's texture and tone to take focus while maintaining easy usability.

“

Tips

Allow 20-25 mm clearance gap to ensure effortless, comfortable access when using the **ACC**. Applicable for both wardrobe and cabinets.

”

Drawer

Provides a clean grip line that ensures smooth handling while keeping the overall look simple and uncluttered. Its durable, straightforward design suits both residential and commercial use, offering lasting practicality with a refined finish.

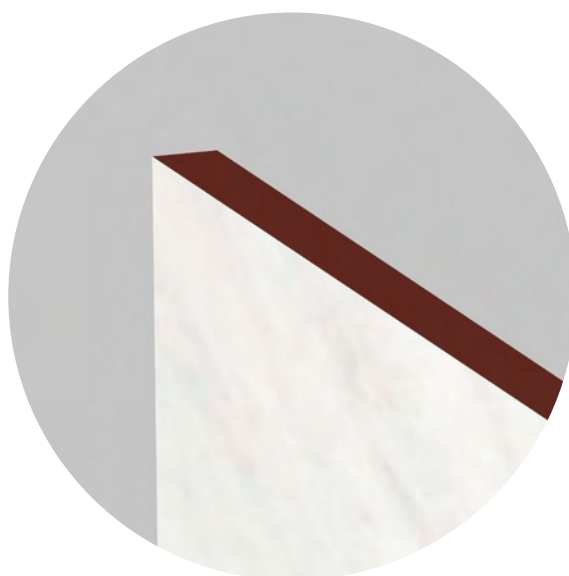

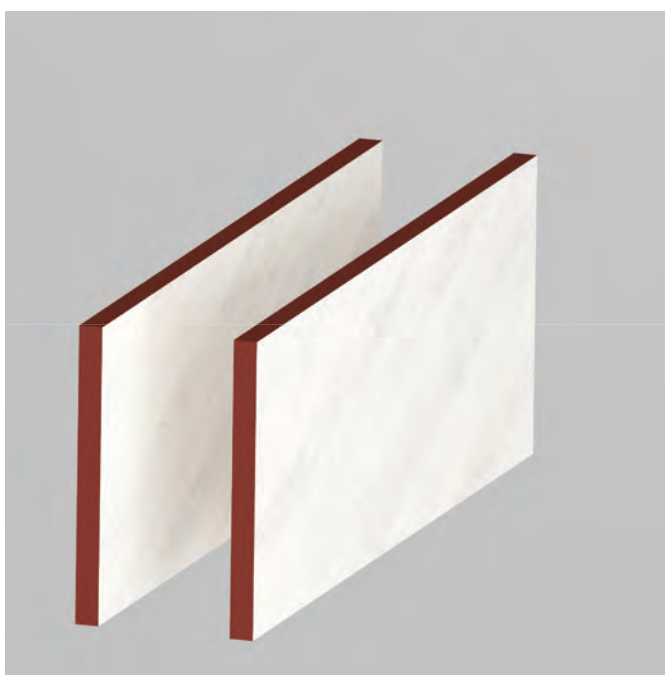

FLAT

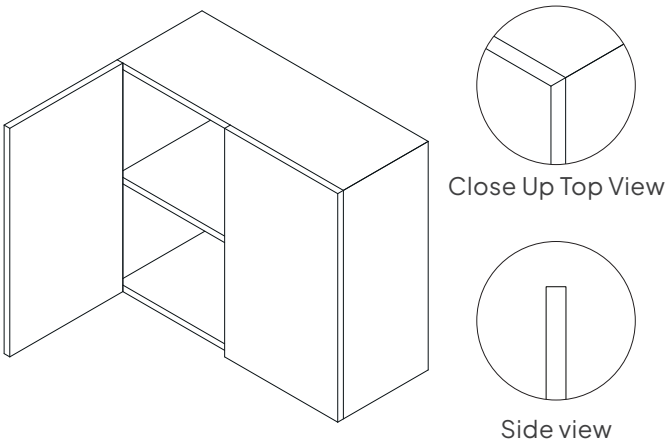

The Flat Profile is the most classic of handleless designs, distinguished by its linear simplicity. Its clean edge provides a universal solution that adapts easily to modern or classic interiors. While understated, it is highly practical highlighting materials and finishes while offering consistent functionality. Flat Profile suitable for projects that demand clarity, continuity, and a neat finish.

FLAT

PURE & MINIMAL
For Your Space

FLAT

A straight, minimal edge that delivers a clean, modern aesthetic with timeless simplicity.

FLAT

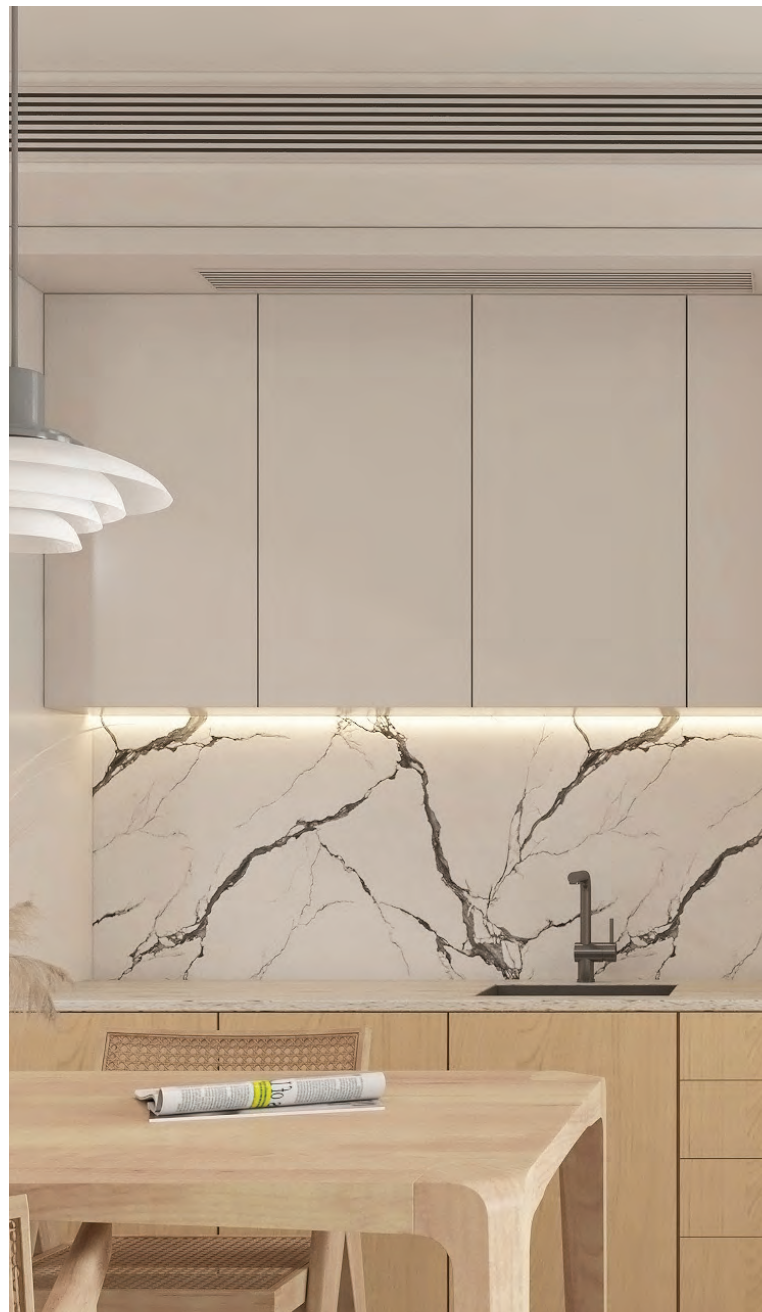

Flat Profile

Wardrobe

Ensures a minimalist wardrobe facade that fits both classic and contemporary interiors. Its flat edge maintains a clean vertical rhythm, allowing materials and finishes to take visual focus. Ideal for achieving a functional, handleless look with Tip-On accessories.

Cabinet

A reliable option for kitchens and living areas, the Flat Profile delivers a professional yet approachable aesthetic. Its straight edge is easy to maintain, making it ideal for high-traffic areas. Best paired with Tip-On accessories to create a functional handleless surface.

“

Tips

Keep the minimalist look and functional by pairing **Flat** with **Tip-On** accessories, perfect for a clean, handleless design on wardrobes, and cabinets.

”

Drawer

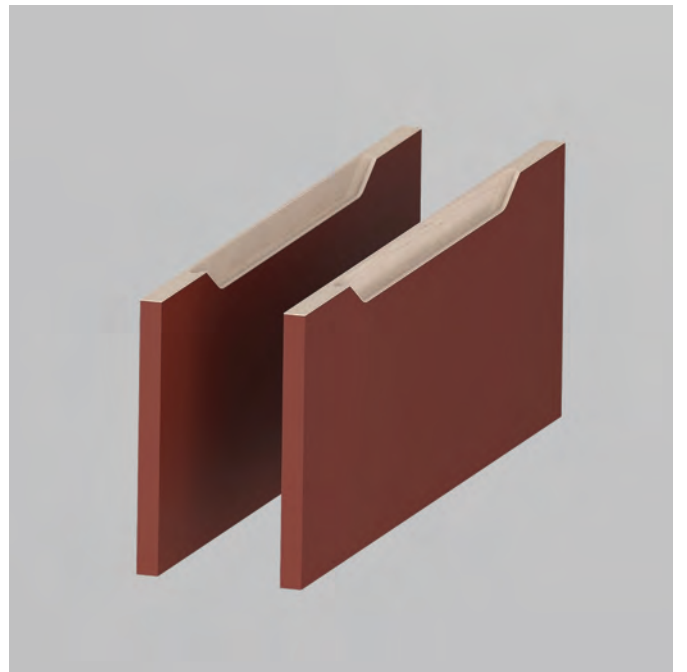

Creates visual consistency across stacked drawers with its linear form. The clean edge supports frequent use while maintaining a sleek appearance. Pair with Tip-On accessories for effortless, handleless access and smooth daily operation.

CENTER CURVE

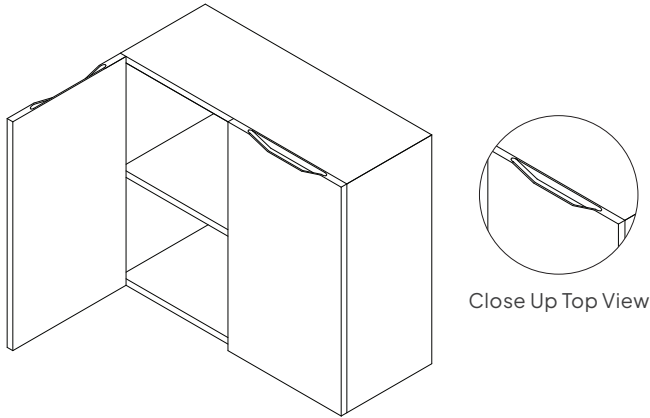

The Center Curve profile introduces a subtle, centered concave design that enhances both comfort and alignment. Its balanced grip ensures practicality while reinforcing symmetry across furniture. With premium build quality and compatibility with sustainable finishes, the Center Curve supports both modern aesthetics and environmentally conscious design choices.

CENTER

Center Curve

Wardrobe

Elevates tall wardrobes with balanced vertical lines and a comfortable center grip. The Center Curve ensures smooth opening for daily use while maintaining a clean, modern look. Perfect for wardrobes between 6–9 ft height, offering proportional elegance and ease of handling.

Cabinet

A refined choice for kitchen or office cabinetry, the Center Curve creates a continuous flow that enhances design balance. Its streamlined profile delivers comfort in use and a polished aesthetic for any layout design.

“

Tips

Best performance on wardrobe doors between 6-9 ft in height for balances proportion and grip while maintaining visual symmetry. Delivers both function and ergonomic comfort for tall installations.

”

Drawer

Creates sleek horizontal alignment across drawers while maintaining ergonomic functionality. Ideal for vanities and storage systems that require frequent access without compromising the design's clean lines. Offers both practicality and visual harmony for modern interiors.

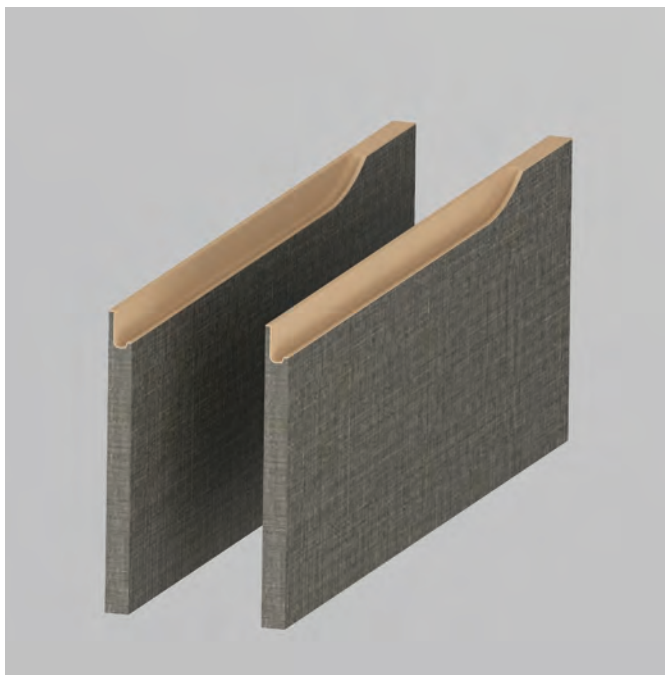

OVAL GLIDE

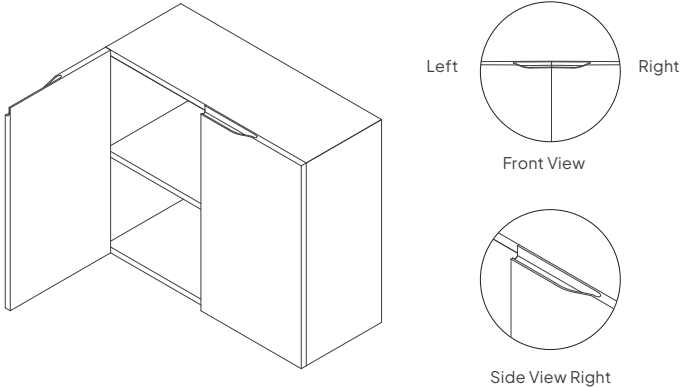

The Oval Glide profile softly rounded edge form with smooth ergonomics, making it a practical yet elegant choice. It offers continuous grip and aligns seamlessly across cabinetry for a refined, handleless appearance. Durable and adaptable, Oval Glide is favoured in both residential and commercial projects that demand comfort and modern simplicity.

Applications

OVALL

Oval Glide Profile

Wardrobe

The Oval Glide profile brings a soft and natural touch to wardrobe doors. Its rounded recess makes opening easy and comfortable, while keeping the overall look smooth and handleless. Perfect for modern wardrobes that need both elegance and everyday practicality. Use the curve as a continuous line across wide wardrobe panels, it creates a sense of calm and balance that works beautifully in minimalist interiors.

Cabinet

For kitchen or storage cabinets, Oval Glide adds a warm, ergonomic touch. The soft contour lets you open doors effortlessly, keeping surfaces clean and simple. Its smooth edge reduces sharp lines, giving your space a more welcoming, fluid look. Choose colour finishes that contrast slightly between the cabinet surface and the oval groove. It helps the detail stand out subtly while maintaining a refined aesthetic.

“

Tips

Pair **Oval Glide** with **J Curve** for a consistent design flow and modern design outlook, especially for cabinets.

”

Drawer

On drawers, the Oval Glide offers a comfortable pull with a smooth, finger-friendly edge. It's practical, stylish, and keeps the design uncluttered. This profile gives a gentle, flowing appearance that ties your cabinetry together. When used across multiple drawers, align the ovals in one continuous line to create a clean, unified design that visually expands your space.

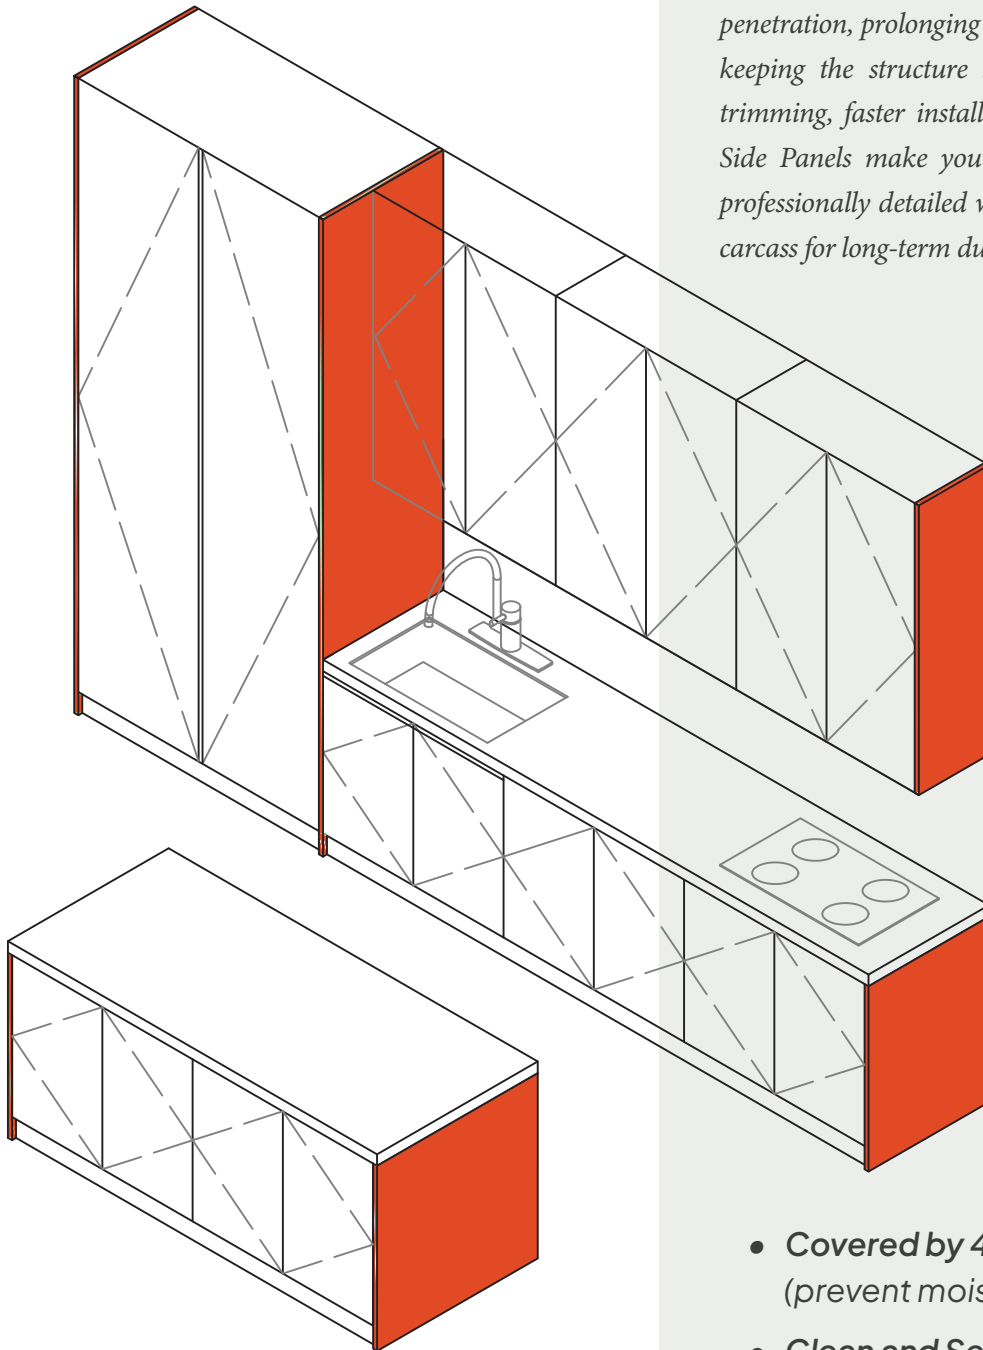

Finishing Details That Define Perfection

Start with TOPMIX COMPONENT, a handleless door panel system that completes the look with side panels and door fillers. Go seamless by matching colors and grain for a calm, built-in feel or contrast with different colors and textures to create a bold design highlight. Our pre-matched finishes cut site fixes and speed up installation, so you spend less time coordinating and more time designing. The result is a modern, professional finish that lightens your job and completes the project.

Side Panels

Side Panels neatly cover the exposed sides of cabinets, acting as a clean finishing canvas that elevates the overall look. Crafted by our component specialists with precision edging, they deliver a refined aesthetic straight out of the box. Each panel features 4 sided edging to prevent water or moisture penetration, prolonging the cabinet's lifespan while keeping the structure stable. With minimal site trimming, faster installation, and seamless edges, Side Panels make your work look polished and professionally detailed while protecting the cabinet carcass for long-term durability.

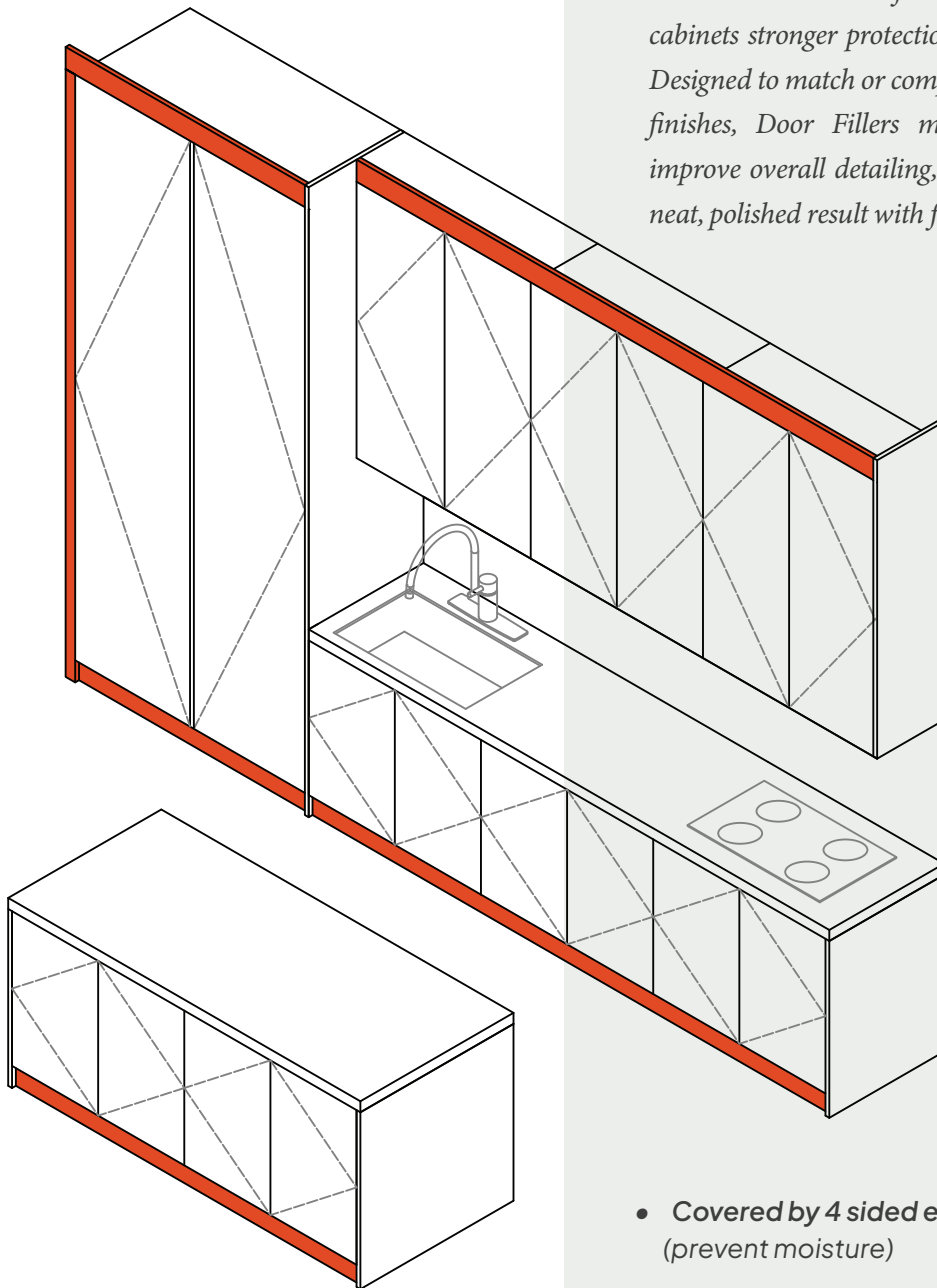

- **Covered by 4 sided edging**
(prevent moisture)
- **Clean and Seamless Edges**
- **Protects Cabinet Carcass**
- **Minimal Site Trimming**

Beyond Function, Into Design Freedom

Door Fillers

Door Fillers solve on-site gaps at walls, ceilings, and floors so doors align properly, reveals stay even, and appliances have enough clearance. They help create smooth transitions, maintain a clean design rhythm, and reduce the need for touch-ups. Each filler is wrapped with 4 sided edging to prevent water or moisture from entering, giving the cabinets stronger protection and a longer lifespan. Designed to match or complement the surrounding finishes, Door Fillers make installation easier, improve overall detailing, and help you achieve a neat, polished result with faster handover.
